LOCKING DEVICE FOR ROLLING DOORS AND SIMILARS

Compact and solid designed locking device of similar characteristics to **ATK02** model, in which the high security cylinder with anti-drilling protection is located in the top of the device and is actuated only by turning the key 90 degrees.

The body of the head has been made of solid chromium plated brass; the rotary latch is manufactured of high resistance steel with anti-corrosive electroplating treatment and its protective cover of hardened-steel with zinc electroplating treatment. All the other elements have been made of either stainless steel or with anti-corrosive treatments.
